17. ABSTRACT (MAX. 250 WORDS)

A catalog has been prepared to help teachers select audio-visual materials which might be helpful in elementary classrooms. Included are filmstrips, slides, records, study prints, films, tape recordings, and science equipment. Teachers are reminded that they are not limited to use of the suggested materials. Appropriate grade levels have been indicated wherever possible, as well as the time length of the films, producer, and year of production. Categories included are: art, foreign language, guidance, health, holidays, language arts, mathematics, music, physical education, safety, science, social studies and civil defense. As an aid in replacing and supplementing existing materials, teachers are invited to submit their comments on the condition and suitability of the materials used. Directions are given on policies, how to order, operation of equipment, delivery and equipment repair.

Curriculum Bulletin No. 164
Stockton Unified School District
Stockton, California
July 1963

PREFACE

This catalog has been designed to help teachers select Audio-Visual materials that might be used in their classes. Whenever possible, we have used the topics that appear in the "Social Studies Framework for the Public Schools of California." An attempt has been made to indicate the appropriate grade level for the materials. There has been no intention of limiting teachers to the use of the suggested materials; nor does this arrangement mean that the teacher's obligation for previewing and evaluating material has been lessened.

As you use materials in your classes, we would appreciate your comments concerning the condition and suitability of them for your purposes. This will aid us in replacing and supplementing with new materials.

AUDIO-VISUAL SERVICES

I. POLICIES

Equipment Use Policy

Please refer to the Superintendent's numbered letter #36 for the policy statement regarding use of equipment.

Film Use Policy

1. Films will be made available without charge to all public schools of the Stockton Unified School District and San Joaquin County.

2. Films to be restricted to use by qualified operators.

3. Films to be used exclusively for school room instruction except:

   a. For adult group meetings, public relations, etc., upon the request of, and for use by, a certificated school staff member. All such use shall be subject to approval of the Audio-Visual Director.
   b. By public service agencies who, by the nature of their work, contribute to school and community welfare and are granted approval for use by the Advisory Committee.

II. HOW TO ORDER

Films

The Stockton Unified School District is part of the San Joaquin County joint film library. This library is maintained and administered by the Office of the County Superintendent of Schools. It is located at 336 East Market Street.

For each film (and an alternate choice) teachers write a separate "San Joaquin County Schools Request Form" (see below)(yellow in color), and send it via their Building Coordinator or Principal to the San Joaquin County Schools Film Library.

<table>
<tr><td colspan="2">Date Wanted</td><td colspan="2" rowspan="2">Do not write in these spaces</td></tr>
<tr><td>Preferred</td><td>Not After</td></tr>
<tr><td colspan="2">School</td><td>Delivery Date</td><td>Return Date</td></tr>
<tr><td colspan="3">Teacher</td><td>Date of Order</td></tr>
<tr><td colspan="4">Order one item and one alternate. Only one item will be booked.</td></tr>
<tr><td>Type MTL</td><td>Catalog No.</td><td colspan="2">Preferred Title</td></tr>
<tr><td></td><td></td><td colspan="2"></td></tr>
<tr><td>Type MTL</td><td>Catalog No.</td><td colspan="2">Alternate Title</td></tr>
<tr><td></td><td></td><td colspan="2"></td></tr>
</table>

(b)

The following suggestions will help get the most efficient film service possible.

1. Send the request form intact (all copies) to the San Joaquin County School Film Library.
2. Send the request forms in at least two weeks prior to anticipated date of use.
3. Press firmly with ball point pen when writing requests.
4. Be certain your name and school name are clearly written on the form.
5. Indicate desired delivery dates under "Date wanted". Allow as great a span of time between "Preferred" and "Not After" as possible.
6. List the name of the film, which is your first choice under "Preferred Title".
7. Supply an "Alternate Title" in the last space of the form. (If first choice film is not available, the alternate will be supplied whenever poossible).
8. Under "Type Mtl." put MP for motion picture film. County teachers use other symbols for other types of materials.
9. Leave catalog number blank as films do not have catalog numbers.

After requested films have been booked by the Film Library clerks, two confirmation slips will be returned to your school. One copy will be for the teacher and the other for the school office.

Considerable work is involved in processing films and sending them to the next user. The delivery of films has now been spread to even out this work load. Each school has been assigned one day of the week for delivery and return of films. (Please note film return date is on the same day of the week as the delivery date.) In emergencies, films will be delivered on other days. All films should be returned on due date unless special arrangements have been made with the film library. Films may also be returned on any day prior to the due date and thus become available for another teacher's use.

FILMSTRIPS, SLIDES, RECORDS, STUDY PRINTS, TAPE RECORDINGS, SCIENCE EQUIPMENT

All audio-visual materials (other than films are issued from the Administration Center, 701 North Madison Street. These materials are delivered to schools on Mondays and are due the following Friday (unless arrangements have been made to keep them longer.)

Teachers order by Request Forms provided or by calling in person and selecting those materials that are most suited. Teachers are always welcome to visit audio-visual services in Room 13 of the Administration Center. If materials are needed for longer periods, special arrangements may be made.

Equipment

The audio-visual department has a limited amount of equipment available to schools on short-term loan in emergencies. Arrangements may be made by phone and most items delivered by mail truck.

III. OPERATION OF EQUIPMENT

Only qualified operators should attempt to use audio-visual equipment. Teachers can learn to operate the most complicated audio-visual machines in one or two lessons. Your principal, building coordinator, or the audio-visual office will be happy to arrange for instruction in equipment operation.

IV. BUILDING COORDINATOR

One teacher has been designated by each principal to act as the audio-visual coordinator of the school. This person also serves on the Audio-Visual Council. The building representative can help you get better use of this catalog and other audio-visual services.

V. DELIVERY

There is daily mail truck service to each school. This truck delivers and returns audio-visual materials and equipment.

VI. EQUIPMENT REPAIR

Repair of projectors, radios, phonographs, etc., is done by the Maintenance Department. Please report to your Principal or A. V. Building Coordinator, at once, if equipment needs repair. He will arrange for repairs, or send the equipment directly to the Maintenance Shop.
